## Executive Profile

A visionary entrepreneur and AI strategist with extensive experience in founding and scaling businesses across various industries, including AI, SaaS, trading, and medical technology. Expert in integrating AI automation, machine learning, and NLP into business processes to drive innovation, operational efficiency, and market expansion. Passionate about leveraging cutting-edge AI to build intelligent business solutions that optimize decision-making and enhance customer experiences.

## AI & Technical Expertise

---

- AI Implementations - Specializing in AI-driven automation, NLP, and deep learning solutions.
- Generative AI - Building AI models for text, image, and multimodal data processing.
- AI SaaS Platforms - Developing AI-first SaaS products tailored for enterprise scalability.
- Predictive Analytics - Leveraging AI-driven forecasting models for business intelligence.
- AI Agencies - Leading AI consulting and implementation for automation-driven businesses.
- LLM Fine-Tuning - Customizing and deploying large language models for specialized industry needs.
- Computer Vision - Implementing AI-powered object recognition, image processing, and CV pipelines.
- AI Workflow Automation - Building AI-powered systems to streamline business operations.
- Edge AI Deployments - Developing AI models for real-time, low-latency processing at the edge.

## Professional Experience

---

### Founder & CEO | Roxate AI

*United Kingdom | Feb 2025 - Present*

- Founded AI-first technology company specializing in AI automation for enterprise workflows.
- Developing a SaaS platform integrating generative AI and AI-driven business process automation.
- Leading the deployment of custom AI models for NLP, multimodal AI, and predictive analytics.

### Founder | AI Edge Labs

*Romania | May 2024 - Present*

- Created an AI agency focused on providing AI-driven solutions for SMEs and large enterprises.
- Developing AI automation strategies for financial institutions, healthcare, and logistics.
- Researching and deploying real-time AI models optimized for edge computing and IoT applications.

### Founder & CEO | AI Automation Hub

*Jordan | Feb 2013 - Present*

- Developed an AI-powered automation agency specializing in AI chatbots, workflow automation, and predictive analytics.
- Deployed AI solutions for companies in e-commerce, fintech, and healthcare, improving operational efficiency.
- Implemented customized AI models for automating customer interactions and backend business processes.

## AI Projects & Research

---

- AI Chatbot Deployment - Developed AI-powered chatbots with advanced conversational capabilities for customer support.
- AI-Powered Document Processing - Implemented AI-driven OCR and document automation for enterprise workflow.
- AI Supply Chain Optimization - Created predictive AI models for demand forecasting and logistics automation.
- Edge AI & IoT Integration - Built AI-driven edge computing systems for real-time industrial automation.
- NLP Custom AI Models - Trained and deployed NLP models for sentiment analysis, AI writing assistants, and content moderation.

## Education & AI Certifications

---

- Bachelor's Degree in Business Administration - Specialized in technology and business strategy.
- Deep Learning Specialization - Stanford University (2024) - Advanced AI model development.
- AI for Business Leaders - MIT Sloan (2024) - AI strategy for enterprise innovation.
- Machine Learning & AI Deployment - Google AI Academy (2023) - AI implementation and automation.
- Generative AI Certification - OpenAI & Microsoft (2023) - Applied AI for business transformation.

## Executive Summary

---

As a forward-thinking AI entrepreneur and business strategist, I am dedicated to building and scaling AI-driven enterprises that leverage the latest advancements in machine learning, automation, and SaaS solutions. My expertise spans from AI model development to AI-powered business process optimization, with a focus on transforming industries through cutting-edge technology. I am actively seeking collaborations and investment opportunities to further expand AI capabilities in business automation, intelligent decision-making, and next-generation AI products.
